BENZING ClubSystem

For the enjoyable work in the club - BENZING ClubSystem

The innovative BENZING ClubSystem is even better than clubPOINT and CAN, as the functionalities of both units have now been combined into a single unit, the BENZING ClubSystem. All of the tasks within the Club have now become child's play, based on the well-known user friendliness of the BENZING M1.

- Large time and date display
- Loud acoustic signals
- Easy and complimentary software download
- Modern design with CAN and clubPOINT in a single unit
- Easily accessible connections for printer, radio clock and PC
- Highest security with the BENZING Pro Chip Ring
- Support for a radio clock and GPS clock
- Improved and faster reading of the electronic chip rings
- Easy printing with USB printer
- Keys to manually set the date and time
- Higher reading range of the chipring

Large time and date display

Always the right time because of the easy-to-read display of the date and time in large letters and numbers always clearly displays the time. The display corresponds similarly to the one on the BENZING M1.

Modern design with CAN and clubPOINT in a single unit

The BENZING ClubSystem combines the functionalities of CAN and clubPOINT into a single unit and does not require any cables. Already at first sight, it is clear that the ClubSystem originates from the BENZING series. Its highly designed exterior combines the characteristics of the BENZING Station and the BENZING M1.

Support of the radio clock and GPS clock

The new BENZING ClubSystem supports all radio clocks delivered to date, as well as the GPS receiver.

Keys to manually set the date and time

If no radio signal is available, the date and time can easily be set using a simple menu on the BENZING ClubSystem.

Additional USB port for the PC

Next to the standard serial RS232 port, the new BENZING ClubSystem also has an integrated USB port, to where modern PCs and laptops can be directly connected. Every major fancier administration software supports this USB interface.

Easily accessible connections

All connections on the BENZING ClubSystem are positioned to be easily accessible. The connections are located on the side, which facilitates easy connection and disconnection.

Loud acoustic signals

A special, powerful loudspeaker integrated into the new ClubSystem signals any action distinctively. The volume can easily be adjusted with a controller.

Improved and faster reading of the chip rings

The BENZING ClubSystem is equipped with a new type of RFID unit for better reading and writing electronic chip rings. This technology is also used in the Lazer (PLB) antenna. Therefore the reading range and the speed to basket a pigeon is increased.

Compatible with the existing Club cables

All existing Club cables and keys are compatible with the new BENZING ClubSystem. It is therefore easy to migrate from the old club system to the new BENZING ClubSystem.

Easy software download

Easy download via computer! Thanks to the PC connection, updating the software has never been easier.

Highest level of safety with the BENZING Pro chip ring

BENZING Pro chip rings are subject to the highest BENZING quality requirements for intensive use in pigeon racing. With its 256bit memory, it dwarfs everything else.

Easy printing with an USB printer

BENZING enables various options for printing stations. With the BENZING Printer Manager, all lists can be sent via the PC to any USB printer. Every USB printer can be used if there is no connection between the PC and printer available.
