

BENZING

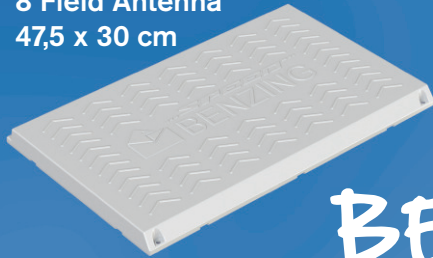

Innovation through Tradition. Since 1863.

SPEED

12 Field Antenna
76,5 x 30 cm

8 Field Antenna
47,5 x 30 cm

High Speed Reading Capability over the entire surface with no dead zones

Chip Ring Range Test with LED

50% Reduced Power Consumption

Double Security

BENZING SPEED Antenna

More than an Antenna - A Safety Warrant

The new **BENZING SPEED** antenna is unbeatably safe and fast

The new BENZING SPEED antenna convinces by the entire set of functionalities of the previous BENZING antennas, improved by additional modules in the areas of safety, protection of the environment and speed.

With its special design and overlapping antenna fields, BENZING guarantees the highest level of clocking reliability over the entire antenna surface. In addition, the new SPEED offers a new range testing of the chip rings, indicated by LED signals and a separate functional test of every single antenna field. The double clocking of the pigeons leads to a double safety effect, totally eliminating dysfunctions.

- High Speed Reading capability - Reading over the entire surface with no dead zones
- Double Security Pigeons are timed twice -
- 12 overlapping fields in 2 rows or 8 overlapping fields in 2 rows
- Flat Antenna with only 2.7 cm height
- Antennas can be placed side by side without any dead zones (with loftPOINT SNN)
- Optimised for the BENZING Pro Chip Ring
- Reduced power consumption by 50 %
- Flat and splash water resistant
- Chip Ring Range Test - Integrated chip ring test with LED
- Works with the BENZING M1 and atis TOP
- 3.2 meter connection cable included
