REAL TIME RESULTS

CONTINUOUS CLOCKING

COMPATIBLE WITH BENZING M3, M1 and G2+

The BENZING Live! SMART HUB 5 is the central interface for data communication between the fancier and the club and makes the handling of a race weekend much easier. An integrated modem automatically connects to the BENZING Cloud - so you do not need additional INTERNET connection.

Another highlight is the loft diagnostics, which shows the current status of your loft system like connected devices, temperature and humidity. An integrated continuous clocking module registers the pigeons even while you are away. Online update services will make your life much easier.
