

BENZING Station

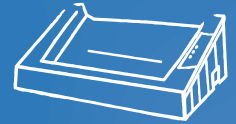

The Security of a second clock - BENZING Station

The BENZING Station is the ideal completion to the BENZING M1, and a must for all fanciers if they would like to get the most out of their clocking system. It offers a variety of functions and combines clubPOINT and INN all in just one unit.

- Easy to handle thanks Plug & Play
- Continuous clocking without the BENZING M1 clock
- Additional storage (backup) of all flight data
- Connection for matrix and laser printers
- SMS messaging via external modem
- Compatibility with the existing equipment
- Highly-audible sound signals
- High security

BENZING Station

Easy Handling

As soon as the BENZING M1 clock is inserted into the BENZING Station, the entire data transmission is fully automatic – the user does not need to do anything more.

Continuous Clocking

Even if the BENZING M1 is not in the BENZING Station, the timing and recording of the arrival data of all pigeons will continue. You will never miss a single pigeon again.

Complete Backup of all Flight Data

The BENZING Station offers the security of a second clock. In addition, all arrival data is stored and encrypted. In the event that the BENZING M1 clock fails all of the data is still available the BENZING Station. Thus, combining BENZING M1 and BENZING Station provides double security, as a result of all the data is being stored doubly.

Online Printing

All conventional printers (matrix, laser) can be connected to the parallel printer port of the BENZING Station, thus enabling the convenient printing of the race data at home. This is also possible online. For every pigeon arrived, the printer automatically outputs one line.

SMS Messaging via external modem

Commonly available modems connected via the RS232 interface can be used for the online transmission to the BENZING Station. Every pigeon fancier can be informed of the arrival time, even if he or she is on the road.

Compatibility with Existing Equipment

The BENZING Station provides for the connections of all your existing antennas.

Highly-audible Sound Signals

A high-performing integrated speaker ensures that the timing will be heard loud enough even from long distances away.

High Security

As in all BENZING products, the utmost importance is placed on the data security of the BENZING Station. All of the security relevant data is encrypted and safeguarded against unauthorised access.
