

Cloud Clocking

The BENZING Live Smart Hub is a network node that is also equipped with its own internal memory. If the BENZING clock is separated from the BENZING Live Smart Hub, the BENZING Live Smart Hub will switch to the cloud clocking function and begin to register the arrival of pigeons. This takes about 5 seconds to activate and will **store the arrivals up to 24 hours from when the BENZING Clock was disconnected**.

BENZING Live Smart Hub LED lights status

- The LED blinks red during initialization and will stop once the connection is established. This may take a few minutes.
- The green LED flashes while data is being transmitted.

There are different LED status to show the state of the BENZING Live Smart Hub.

Cloud Clocking with BENZING M3/M2

System				
System Info		Settings	Antenna Test	
✓ BENZING M3	Sw 1.17	Hw 2.1	IR 39	15.9 V
✓ Live Smart Hub 5	Sw 5.6	Hw 2.1	55%	14.9 V

How to connect BENZING Live Smart Hub

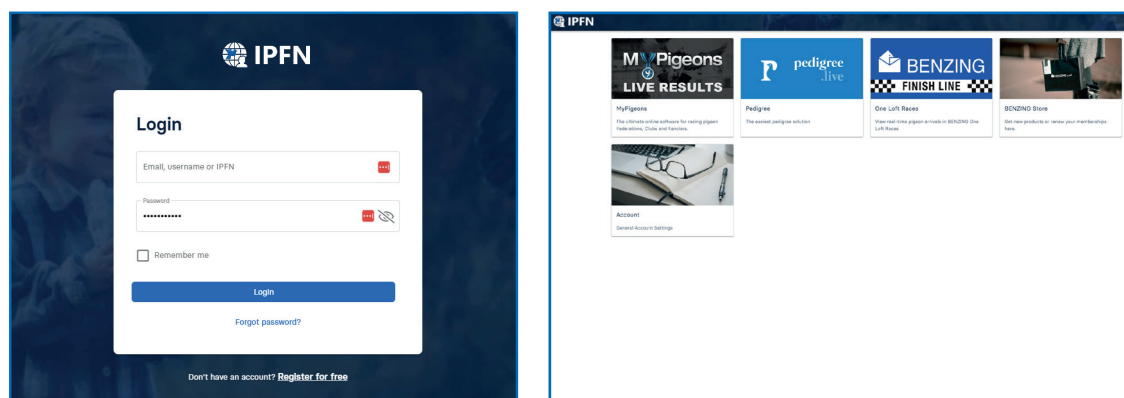

Note: We recommend to use always the latest available software version.

How to install

- 1 Update your devices to the minimum required software versions mentioned above.
- 2 Plug in the 9-pin connector of the adapter cable into the BENZING Live Smart Hub (highlighted green in drawing).
- 3 Connect the other 9-pin plug of the adapter cable into the antenna cable.
- 4 Connect the cable with the „GPS“ to the SMA jack on the BENZING Live Smart Hub device.
- 5 Make sure that the GPS receiver is placed outside the loft. This will ensure correct functionality.
- 6 Connect the round plug of the power supply into the round power jack with the mark „DC 12V“ of the BENZING Live Smart Hub device.
- 7 Plug in the power supply to your power socket.
- 8 **BENZING M3/M2:** Plug in the matching 9-pin plug of the adapter cable into the BENZING M3/M2 fancier cable.
BENZING M1: Plug in the matching 9-pin plug of the adapter cable into the BENZING M1 fancier cable.
BENZING Express G2+: Plug in the matching 9-pin plug of the adapter cable into the BENZING Express G2 fancier cable.

BENZING MyPigeons.live or ipfn.live Website Online

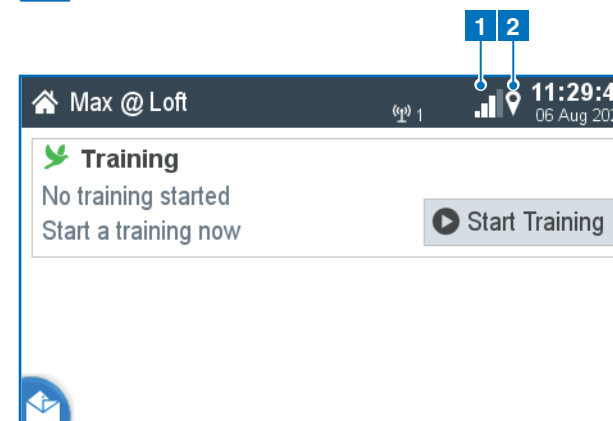

Register and login on the website www.mypigeons.live/ipfn.live

You can log in to the website using your Email, Phone, User ID or IPFN and password.

- 1 If you have not registered yet, click on „Register“ to create a BENZING account.
- 2 Enter your data in the window below and click on „Register“. You will receive an e-mail with the confirmation.
In this email, click the verify button to confirm the registration. The email or SMS must be confirmed first; otherwise, the IPFN remains invalid and cannot be used. After logging in, you will be taken to your personal dashboard.

BENZING M3/M2 with BENZING Live Smart Hub

Start BENZING Live:

After all devices are connected to each other and the power is connected, the BENZING Live Smart Hub and the BENZING M3/M2 will start. See here the most important information about the connections:

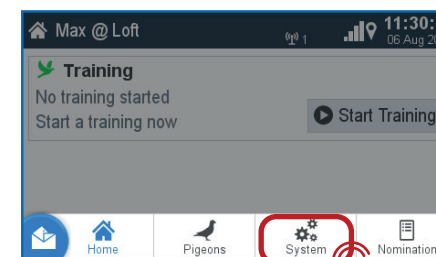

Status BENZING Live Explanation

- 1 Cellular Status: Good connectivity
 Cellular Status: No connectivity
- 2 GPS Signal
 Evaluation@home is possible

BENZING Live Wifi connection

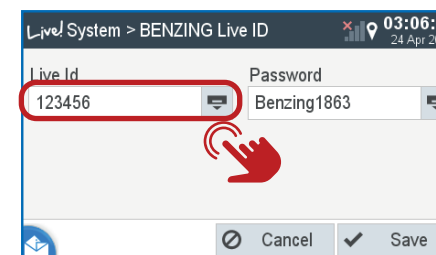

Connecting to Wi-Fi is a recommended option for a stable and reliable connection, reducing dependence on the SIM card's mobile network.

How to set the LIVE ID and Wi-Fi settings using the BENZING M3/M2

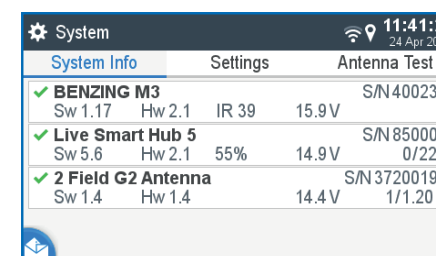

Home Screen:

Open the main menu and click on System.

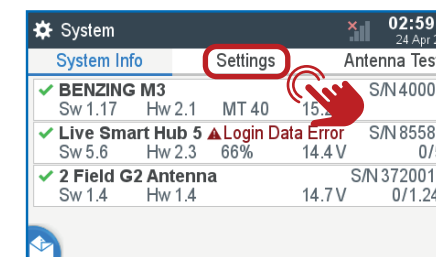

Open keyboard:

Please press on the button to open your keyboard.

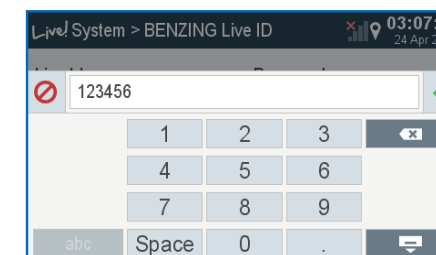

BENZING Live Smart Hub connected:
 Once your LIVE ID and Password is stored correctly, the BENZING Live Smart Hub will be displayed without any notification.

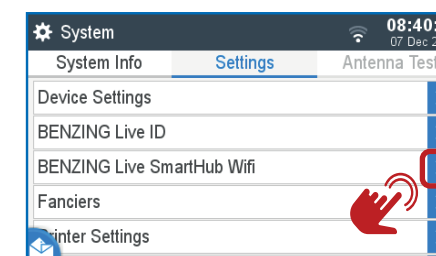

System:

Choose the settings tab and select the BENZING Live option. **Note:** If there is no Live ID or Password entered, it will show a Login Data Error.

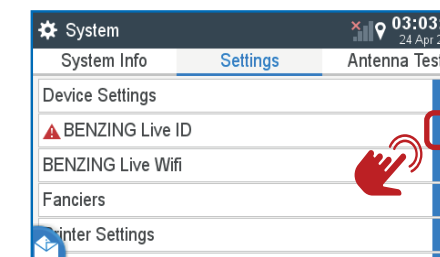

Enter LIVE ID:

Please enter your LIVE ID which you can find in your MyPigeons account in Smart Loft and confirm with the green button.

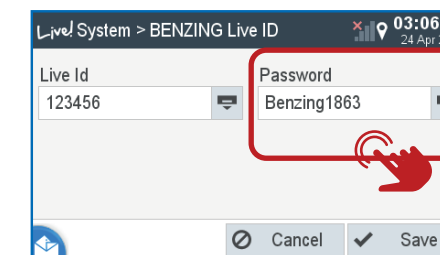

How to connect the WiFi:
 Use a BENZING M2/M3 with a SmartHub 5 to connect to WiFi via Menu > System > Settings > Smart-Hub WiFi. Select your network and

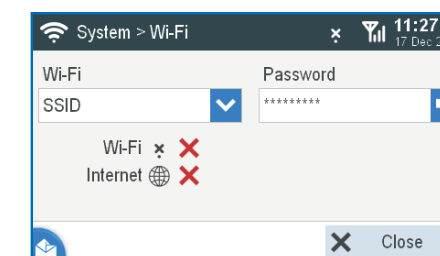

System:

Choose the settings info tab. You will notice that the BENZING Live is not activated yet. ▲

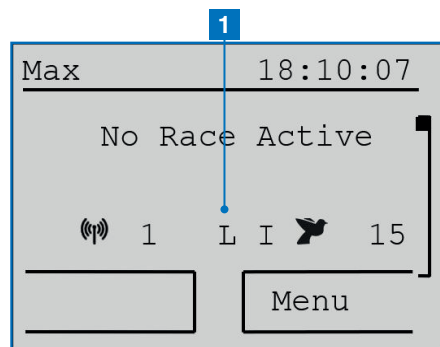

Check LIVE ID:

Enter your password and confirm. Your LIVE ID and password is displayed. Please press the save button to store your details.

enter the password using only letters and numbers. Special characters aren't supported. The system auto-switches between WiFi and mobile based on signal strength.

BENZING M1 with BENZING Live Smart Hub

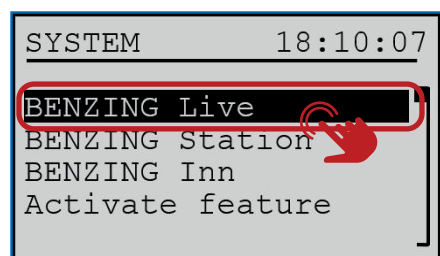

1 Status BENZING Live Explanation

- L Connected with BENZING Live Smart Hub
- L! BENZING Live server is transmitting data
- :L: (flashing L) GPS or GSM connection is lost

Start BENZING Live Smart Hub:

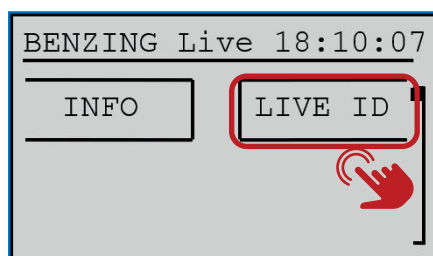

Once all devices are connected to each other, connect the power to the system. The BENZING Live and the BENZING M1 will start up.

Settings

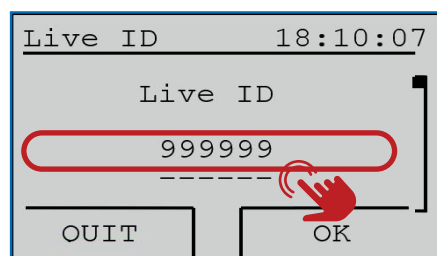

General:

Please choose the MENU button and then select BENZING Live to be able to enter the LIVE ID.

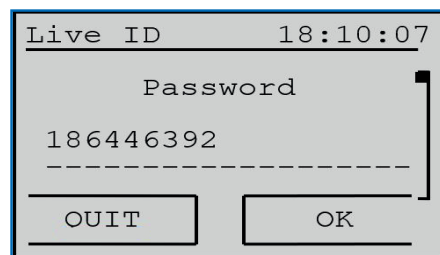

LIVE ID:

In order to have the GSM network and transfer the arrival data, you need to enter a user ID and password. To enter the login data, select the "LIVE ID" button.

Enter LIVE ID:

Please enter the Live ID and the password which can be found in your account on mypigeons.live in Smart Loft.

Connecting with LIVE ID:

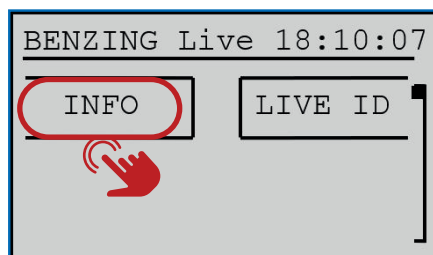

After you entered your LIVE ID and password press the "OK" button to store your login data. The BENZING Live Smart Hub and the BENZING clock will now be ready for transmitting data over the GSM network.

Notice:

With [▲] or [▼] you can select the desired characters and numbers.

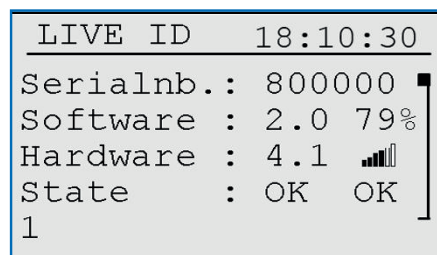

With [◀] or [▶] you can move the cursor to the left and to the right. [OK] (green button) saves the entered data.

If there is no cellular connection or a connection is interrupted, all data will be sent as soon as the connection is reestablished.

Check Settings:

When you press the "INFO" button in the BENZING Live menu you will see all the system information from the BENZING Live Smart Hub.

LIVE ID Overview:

This screen shows the overview about the software version and LIVE status.

Explanation Settings:

There are several different „States“ that can occur:

SIM: SIM card not inserted or defective

INIT: The BENZING Live Smart Hub is in Initial/Startup state

OK: Everything is OK

COM ERR: Communication problem

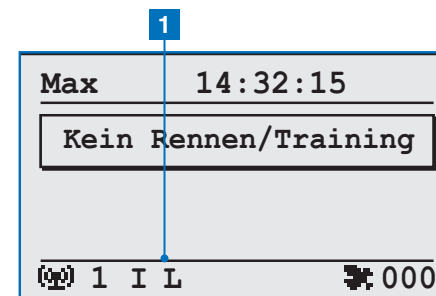

1 or X: 1 = user details correct

x = user details not correct

NOK: No GPS signal / GPS receiver not connected

79% The symbol and the percentage shows you the quality of the signal.

BENZING G2+ with BENZING Live Smart Hub

1 Status BENZING Live Explanation

- L: Connection to the BENZING Live server is OK
- L! Login error. BENZING Live Smart Hub could not login at the server
- L-G: GPS not OK, GPS not recognized
- L-M: Modem error. Mobile network not detected
- L-C: Communication error

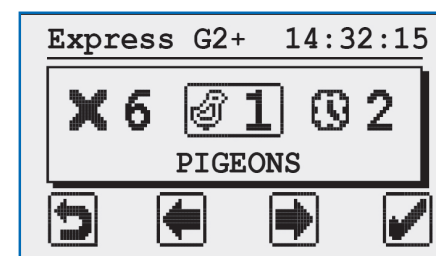

Note:

Only the BENZING Express G2+ used in combination with the BENZING Live Smart Hub 5 supports Wi-Fi connectivity.

Start BENZING Live Smart Hub:

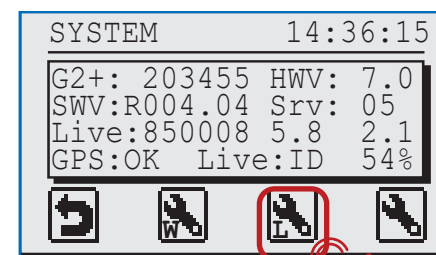

Once all the devices are connected to each other, connect the power to the system. The BENZING Live Smart Hub and the BENZING Express G2+ start up.

Settings

Main Menu:

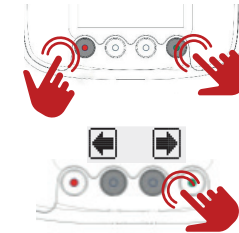

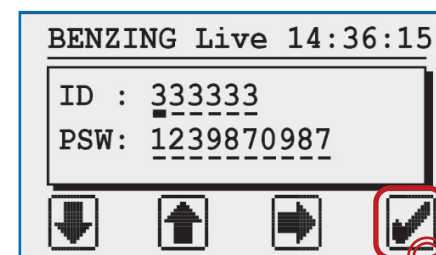

The Main Menu of the BENZING Express G2+.

System:

Please enter your LIVE ID which you can find in your MyPigeons account in Smart Loft and confirm with the green button.

The LIVE ID and password remain stored even without a power supply. The BENZING Live SmartHub and the BENZING Express G2+ are ready for use.

Activate the Main Menu:

Push and hold the red and green buttons of the BENZING Express G2+ for appropriately 3 seconds.

Connecting with LIVE ID:

To transmit data via the GSM network, you will need to enter a User ID and Password. To enter the login data, use the two middle buttons to scroll to System menu option - System Icon [3]

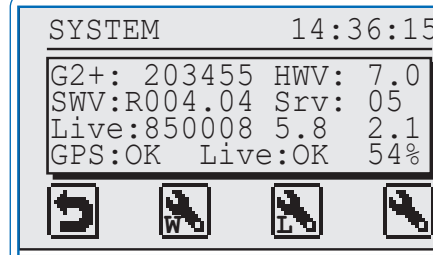

Enter the settings menu:

Select the green button to enter the settings menu. The system settings will be displayed.

Explanation Settings:

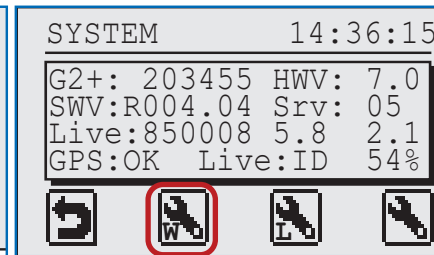

The system screen displays various information about the system, including the status of the BENZING Live Smart Hub. The last line of the status screen shows the the GPS and GSM connection status.

- GPS: OK** GPS is OK, position could be determined
- GPS: --** GPS not OK, GPS not recognized
